

177-screen platform map

A concise role-and-workspace breakdown of the current Vossie UI/UX architecture.

177

Total screen designs

Across Marketplace, Operations, shared access and feature-gated extensions.

Overall breakdown

Workspace	Screens	Scope
Access / Authentication	12	Registration, verification, recovery and staff sign-in.
Shared / Account	24	Account, workspace switching, messages, support, wallet and security.
Buyer	41	Home, Explore, Activity and Account; owned orders and requests.
Seller	25	Requests, Shop, Earnings and Account; own business only.
Courier	14	Offers, Delivery, Earnings and Account; assigned jobs only.
Campus Hub	8	Intake, scans, transfers and account; assigned hub custody.
Transfers	9	Routes, manifests, scans and issues; hub-to-hub transfer operations.
Incubation	12	Overview, demand, businesses and plans; campus-scoped support evidence.
Operations	17	Permission-controlled moderation, finance, support, compliance, security, admin and configuration.
Extensions	15	Feature-gated categories and approved organiser/extended workspace capabilities.

Application family breakdown

APP 1 · VOSSIE MARKETPLACE	APP 2 · VOSSIE OPERATIONS
80 role-specific screens Buyer — 41 Seller — 25 Courier — 14 Access (12) and Shared (24) experiences layer across relevant student roles rather than becoming separate student accounts.	46 operational workspace screens Campus Hub — 8 Transfers — 9 Incubation — 12 Operations — 17 Operations uses granular permissions for moderation, finance, support, compliance, security, administration and platform control.

How the 177 reconciles

12 Access + 24 Shared + 41 Buyer + 25 Seller + 14 Courier + 8 Hub + 9 Transfers + 12 Incubation + 17 Operations + 15 Extensions = 177 screens.

The 177-screen atlas is the full design baseline, not a requirement that every screen ship in the first MVP. Shared identity and permission rules connect the workspaces.
