Hosted prototype

- Vossie Marketplace hosted prototype: <https://vossie-marketplace.paballokali11.chatgpt.site>

ChatGPT Sites project reference

A prior ChatGPT Sites project existed and was used as the original prototype base. The public prototype is reference material, while the newer architecture and Figma system override old behaviour where decisions changed.

Shared ChatGPT conversation

A shared EduHackers conversation link was provided during the project. Because shared-chat pages are not always retrievable programmatically, project knowledge was recovered through conversation context and the saved artifact library instead.

Figma production context

Later work created Vossie Figma production files for the design-system and prototype pipeline. Treat the latest approved Figma file plus Brand Identity as UI source of truth.

Core file set for a fresh account

Upload first:

1. OO_ALL_IN_ONE_CONTEXT.md
2. Latest Brand Identity / UIUX profile
3. Vossie_Platform_Strategy_Differentiation_System_Blueprint_v12.pdf
4. Vossie_Full_UIUX_Page_Architecture.pdf
5. Vossie_177_Screen_Map.pdf
6. Vossie_Motion_and_Interactive_3D_Showcase.pdf
7. Developer Series 1–4
8. Business Analysis + Market Research
9. CMO Marketing Playbook + Visual Advertising Pack

Source precedence

1. Latest explicit user decision.
2. Approved Brand Identity for branding.
3. V12/latest platform blueprint for product policy.
4. Full UI/UX Architecture for screen structure.
5. Developer Series for execution-specific rules.
6. Existing live prototype only as a reference if it conflicts with newer decisions.
