

Source Summary — Motion and Interactive 3D Showcase

The motion showcase defines approximately 30 motion contracts plus optional interactive 3D concepts.

Core principle: motion explains cause/effect and state; decoration is secondary.

Important motion families include: - account steps, - press/submit feedback, - navigation, - workspace switch, - search continuity, - sheets/filters, - product continuity, - basket feedback, - seller matching, - request arrival, - money-state transitions, - order milestones, - courier location, - QR scan recognition, - recipient handover, - transfer reconciliation, - seller availability/listing publication, - messaging/notifications, - Incubation panels, - Operations queue updates, - loading/offline/recovery.
