

vossie

CMO Marketing & Advertising Playbook

Brand-led campus launch system • Street-pole posters • Campus media • Digital • Reels • Activations • 2026

Marketing objective: make Vossie recognizable before asking students to understand every feature. Build the brand around one simple promise — useful things, student opportunity and campus convenience in one verified marketplace — then convert awareness into verified users, listings, requests and completed transactions.

Brand audit basis: the approved profile uses the custom lowercase Vossie wordmark with joined “ss”, warm ivory #FAF8F2, Vossie navy #29475B, powder blue #AFCBDE, slate blue #567487 and pale sage #DDE5D9. Nimbus Sans is the supporting typeface; the recurring diagonal powder-blue panel is the campaign device.

1. Brand audit — what marketing must protect

The marketing system should amplify the existing identity rather than invent a separate campaign brand.

Element	Locked direction	Marketing use
Wordmark	Rounded lowercase; joined ss; Marketplace descriptor	Hero identity on posters, launch film, landing pages
Compact mark	Joined ss icon	Avatars, QR seals, small stickers, social thumbnails
Palette	Ivory / navy / powder / slate / pale sage	Ivory dominates; navy structures; powder is campaign signal
Typography	Nimbus Sans; concise bold headings	Short outdoor copy; readable mobile/social
Photography	Product clarity + campus/student-business context	Real students/products where consented; avoid generic corporate stock
Graphic device	Restrained diagonal powder-blue panel	Unifies posters, sleeves, social frames and activation signage

Logo rules: preserve original artwork and proportions; reserve clear space around the mark; avoid stretching, shadows, outlines, busy-photo placement and arbitrary recolouring.

2. Positioning & message architecture

Vossie should not lead with technical complexity. Lead with the student outcome, then reveal the ecosystem.

Brand positioning: “the campus marketplace that connects everyday needs with student opportunity.”

Audience	Primary message	Proof / CTA
Buyer	Find what you need on campus.	Search, Requests, Reels, order tracking → Join / Find it
Seller	Turn what you make or sell into campus demand.	Store, offers, analytics, Reels → Start selling
Courier	Move campus orders and earn locally.	Eligible jobs, route, QR handoff → Become a courier
Student entrepreneur	Made on campus can become a real business.	Demand insight + Incubation → Build your store
Campus stakeholder	Visible, accountable student commerce.	Operations, moderation, analytics → Pilot Vossie

Copy style stays friendly and direct. The brand profile already establishes phrases such as “What do you need?” and “Made on campus.”; campaigns should build from that language rather than adopting slang that will date quickly.

3. Campaign platform — GOOD THINGS. BRIGHTER CAMPUS.

Use one campaign idea across outdoor, social, campus activations and product launch so repeated exposure builds recognition.

Campaign pillar	Headline territory	Visual
Find	What do you need?	Single object/product floating on ivory + powder diagonal
Sell	Made on campus.	Real student maker/seller + product
Move	Across campus. Without the mission.	Package/courier route rendered as Vossie dot
Request	Can't find it? Ask campus.	Search result collapses into Request It
Discover	Your campus has more than you think.	Reels-style vertical product/student-business montage
Grow	Small start. Real business.	Seller progression / orders / Incubation

The dot from the Vossie identity can be a secondary motion/campaign signature online: it lands on products, becomes a map pin, request, notification or package. Static outdoor executions should remain simpler.

4. Street-pole poster system

Street-pole advertising should be treated as a high-frequency recognition medium, not a miniature brochure. Outdoor placement requires the relevant municipality/landowner/campus approval.

Layout: top 15% logo; middle 50% one headline + one image/object; bottom 35% CTA/QR/short URL. No feature lists. Headline must work from a moving vehicle/pedestrian glance. Prepare municipal/campus-compliant sizes only after placement approval.

5. Outdoor poster concepts — campaign family

Use multiple messages but one unmistakable visual system.

Execution	Headline	Subline / CTA	Primary audience
P01	WHAT DO YOU NEED?	Find it on campus. Scan to open Vossie.	Buyer
P02	MADE ON CAMPUS.	Shop student businesses around you.	Buyer + Seller
P03	SELL HERE.	Your campus is already your market.	Seller
P04	CAN'T FIND IT?	Request it. Let sellers come to you.	Buyer Request
P05	SEE IT. TAP IT. GET IT.	Marketplace Reels → product → order.	Discovery
P06	GOING THAT WAY?	Move a campus order. Earn locally.	Courier
P07	GOOD THINGS. CLOSER.	Campus pickup and delivery, in one place.	Buyer
P08	YOUR SIDE HUSTLE HAS A HOME.	List. Sell. Learn. Grow.	Entrepreneurship
P09	ONE CAMPUS. MORE OPPORTUNITY.	Buy. Sell. Move. Build.	Master awareness

6. Campus physical media ecosystem

Street poles are only one physical surface. The highest-value placements are where students wait, walk, eat, study and transact.

Format	Placement	Creative
A2/A3 posters	Residences, noticeboards, labs, libraries, student centres	Single headline + QR
Table talkers	Food areas / common spaces	Find lunch / student food / Request It
Floor/wayfinding decals	Activation zones only with approval	Dot trail → Vossie stand / QR
Residence door cards	Approved residence activations	"Your res is already a marketplace."
Counter cards	Student sellers / campus partners	"Find us on Vossie."
QR stickers	Approved seller packaging / stalls	Store/Reel deep link
Digital screens	Campus display inventory	6–10 sec motion: dot → need → Vossie
Activation booth	Launch days / events	Live listings, seller onboarding, Request Wall

7. Launch activation — Vossie Market Day

The activation should create real marketplace liquidity, not only hand out merchandise.

Format: a branded campus pop-up with live student sellers, a Vossie Help/Verification desk, Buyer Request Wall, courier demo, Reels recording corner and QR onboarding points.

Zone	Experience	Conversion
Find It	Browse live campus listings on devices	Buyer verified + first save/cart
Sell It	Seller onboarding and product-photo station	First listing published
Request Wall	Students post something they cannot find	First Request created
Reels Booth	15-second seller/product content	First Reel published
Move It	QR pickup/tracking demo	Courier interest / education
Build It	Incubation/business support touchpoint	Entrepreneur lead

Merchandise is optional; onboarding and real transactions are the event KPI.

8. Social strategy — TikTok, Instagram, Reels

The social layer should feel like campus culture with commerce embedded, not a corporate product account.

South African platform data indicate Instagram's 18–24 group is its largest age segment in August 2026; this supports prioritising vertical visual content for student acquisition, while campus-focused youth agencies also sell social, influencer, activation and residence programmes as standard channels.

Content pillar	Example	Cadence
Campus Finds	3 things under R200 on campus today	3–5 / week
Seller Stories	Meet the student behind the product	2 / week
Request It	We asked campus what they couldn't find	1–2 / week
Reels → Buy	Native Vossie Reel with tagged listing	3 / week
Courier POV	A campus delivery from accept to QR handoff	1 / week
Build in public	Feature/update/student feedback	1 / week
UGC	Unboxing, pickup, seller milestone	Always-on

9. Paid digital & retargeting

Paid media should amplify proven campus creative; it should not substitute for marketplace liquidity.

Funnel	Audience	Creative	Conversion
Awareness	Campus-radius / student-age where platform policy permits	6–10 sec brand + problem videos	Landing/open
Buyer activation	Engagers / site visitors	Real products, Requests, Reels	Verified account + first intent
Seller acquisition	Student entrepreneurs / creator/business interest	Seller story + demand proof	Store/listing
Retarget	Visited but inactive	Specific campus supply / “still looking?”	Search/request/order
Retention	Existing users	New supply, saved category, seller drop	Repeat transaction

Do not target or imply sensitive personal attributes. Keep creative campus-specific through context, inventory and location—not invasive profiling.

10. Student ambassador & creator system

Peer distribution can make Vossie feel native to campus, but the programme needs measurable work rather than vanity follower counts.

Role	Deliverables	KPI
Campus Ambassador	Onboarding, activations, seller recruitment, weekly feedback	Verified activations / quality sellers
Seller Creator	Product Reels, launches, UGC	Attributed views→product→order
Residence Rep	Approved res-level awareness and Request drives	Verified users / requests
Courier Champion	Explains safe courier flow and recruitment	Eligible courier activations
Micro-creator	Campus-specific content, not scripted endorsements	Cost per verified activation

Provide a brand kit: logo rules, colour templates, 9:16/1:1 frames, disclosure rules, prohibited claims, QR/deep-link generator and content examples.

11. Ad creative library

Every format should map to a specific behaviour rather than generic 'download now' messaging.

Asset	Hook	CTA
6s vertical	Need it? Someone on campus might have it.	Find it
15s Buyer	Search → Reel → product → order	Open Vossie
15s Request	No result → Request It → seller offers	Request it
15s Seller	Make/list/post Reel/order notification	Start selling
15s Courier	Go online → job → QR → delivered	Courier with Vossie
30s ecosystem	Buyer → Seller → Courier → Operations	See how Vossie works
Carousel	5 things Vossie can do on your campus	Swipe / Join
Static	One object + WHAT DO YOU NEED?	Scan / Search

12. Copy bank — ready for design

Short copy is intentional: outdoor and social should create recognition and action, while the product explains itself after the click.

Use	Copy
Master	GOOD THINGS. BRIGHTER CAMPUS.
Buyer	WHAT DO YOU NEED?
Discovery	YOUR CAMPUS HAS MORE THAN YOU THINK.
Request	CAN'T FIND IT? REQUEST IT.
Seller	MADE ON CAMPUS.
Seller	YOUR CAMPUS IS YOUR MARKET.
Entrepreneur	YOUR SIDE HUSTLE HAS A HOME.
Reels	SEE IT. TAP IT. GET IT.
Courier	GOING THAT WAY?
Delivery	GOOD THINGS. CLOSER.
Ecosystem	BUY. SELL. MOVE. BUILD.
Launch	VOSSIE IS ON CAMPUS.

13. Campaign rollout — 8 weeks

Launch in waves so marketing demand does not hit an empty or unstable marketplace.

Week	Objective	Activity
-2	Seed supply	Seller recruitment, product photography, first Reels, ambassador training
-1	Tease	Dot/wordmark posters, "What do you need?" social, Request collection
1	Reveal	Street/campus posters, Market Day, creator wave, launch film
2	Buyer conversion	Campus Finds, first-order/request content, retargeting
3	Seller proof	Seller stories, orders/milestones, listing drive
4	Request loop	Unmet-demand campaign; sellers respond publicly
5	Courier education	Courier POV, local delivery demos
6	Entrepreneurship	Incubation/seller-growth stories
7-8	Optimize	Scale winning categories/creative; suppress weak messages

14. Measurement framework

Marketing success is verified marketplace behaviour, not impressions alone.

Stage	Primary KPI	Secondary
Awareness	Unique campus reach / aided recognition	Video completion, QR scans
Acquisition	Cost per verified activated user	Landing→verification rate
Buyer	First search/save/request/cart/order	Search success
Seller	First quality listing / first sale	Time to first sale
Reels	View→product click→order attribution	Completion/share
Courier	Eligible activated courier	Job acceptance/completion
Retention	30-day repeat transaction	D7/D30 active
Marketplace	Completed orders + request conversions	GMV / disputes / cancellations

15. Budget architecture

Use percentages until supplier quotes and campus permissions are known.

Bucket	Lean pilot share	What it covers
Creative production	20%	Photography/video, templates, poster adaptations
Physical media	15%	Approved printing/placements/signage
Campus activation	20%	Market Day, equipment, staffing
Creators/ambassadors	15%	Performance-based campus distribution
Paid social	20%	Amplification/retargeting
Measurement/contingency	10%	Tracking, testing, reprints, recovery

If the launch remains zero/low budget, preserve the same structure but replace paid reach with campus-owned inventory, student ambassadors, seller UGC and organic Reels. Do not sacrifice tracking: unique QR/deep links by campus, poster and creator are inexpensive and essential.

16. Outdoor compliance & placement control

Do not print or install street-pole material until the specific municipality, road authority, landowner and campus requirements are checked.

South Africa's SAMOAC framework explicitly covers lamppost advertising, street furniture, large posters and commercial signs at educational facilities. Municipal rules vary. Johannesburg's Outdoor Advertising By-law regulates signs visible from public places/roads and includes approval and safety restrictions. Therefore the campaign concept can be standardized, but dimensions, mounting, duration and permissions must be localized.

Before placement	Control
Site inventory	Record municipality/road/campus owner for each pole/surface
Permission	Written approval/booking before production
Artwork	Check size, height, material, illumination and traffic-safety restrictions
Installation	Approved contractor/method; no trees/traffic signs/unsafe obstructions
Flight dates	Install/remove dates logged
Proof	Photo evidence + QR/placement ID
Removal	Responsible owner and deadline

17. Marketing operating system

CMO execution should connect campaign creative directly to marketplace data.

Weekly ritual	Decision
Monday liquidity review	Which categories/campuses need supply or demand?
Creative review	Which hook drives verified activation, not just views?
Seller pipeline	Which sellers need onboarding/content/support?
Request intelligence	What are students asking for that is missing?
Trust review	Any ad promise creating support/dispute issues?
Friday scorecard	Scale, revise or stop each campaign asset

Marketing should have a campaign ID attached to deep links/QRs so acquisition can be connected to downstream events: verification, listing, request, order, delivery and repeat behaviour.

18. Production brief — what the design team creates next

This playbook is the campaign system; the next asset sprint should turn it into print-ready and platform-ready creative.

Deliverable	Variants
Street-pole poster master	P01–P09; portrait; print-ready + mockup
Campus poster	A2/A3; Buyer/Seller/Request/Courier
Digital signage	16:9 and 9:16, 6–10 sec motion
Social templates	9:16 Reel, 1:1 post, 4:5 feed, Story
Creator kit	Logo, frames, lower thirds, CTA, disclosure guidance
Activation kit	Backdrop, counter card, Request Wall, QR stands, wayfinding
Seller kit	"Find us on Vossie" card/sticker, Reel cover, packaging insert
Launch landing	Campaign hero + role CTAs + campus selector
Tracking kit	Unique QR/deep links and naming convention

Design rule: use the approved Vossie artwork and palette. The custom logo must never be retyped as a font. Outdoor creative should be simpler than the app UI: one message, one object/person, one CTA.

19. CMO launch recommendation

Build recognition first, then liquidity, then repeat behaviour.

The launch should open with the master campaign “GOOD THINGS. BRIGHTER CAMPUS.” and the recognition question “WHAT DO YOU NEED?”. Street/campus posters and digital creative create the memory structure; Market Day and ambassadors convert it into verified users and supply; Requests expose missing demand; Reels make student sellers discoverable; courier content follows only once the fulfilment flow is stable.

The key strategic discipline is to avoid advertising Vossie as if every feature is already production-live. Campaign claims must follow the actual pilot state. This keeps the brand principle of dependability intact and protects trust during the highest-risk phase: first use.

Source notes: Brand identity and logo rules are taken from the existing Vossie Brand & UI/UX Profile. Market-channel context uses current South African social-platform data and student-marketing channel evidence. Outdoor concepts must be localized against municipal/campus approvals and the SAMOAC framework.
