VOSSIE MARKETPLACE

Design system

A production-ready visual and interaction specification for the student marketplace.

01 Identity & colour
02 Type & foundations
03 Components & journeys

Primary teal | Sky blue | Beige | Forest | White

REFERENCE BASED / 12 OCTOBER 2026 / VERSION 1.0

The Vossie design language

Student-first commerce. Premium restraint, not a university LMS or a Vossie-branded shop.

Calm and discoverable

White space is the default. Product and service photography carri visual interest.

Marketplace, not merch shop

Vossie is the platform. Every independent seller retains their own shop name and photography.

Campus-first, not campus-only

Show the selected campus clearly; allow eligible cross-campus discovery and fulfilment.

Native-feeling iOS

Use SF Symbols where licensed and available, familiar interaction and thumb-friendly controls.

Identity without clutter

Wordmark appears in key headers/authentication. Do not repeat it every item or banner.

WORDMARK / NON-NEGOTIABLE

Use the supplied geometric vossie wordmark with the distinctive linked ss. Keep the letter shapes, baseline and MARKETPLACE tracking intact.

Do not substitute cursive scripts, add starbursts or redraw the logo using generative imagery.

Colour foundations

One primary product teal, supported by a soft campus-inspired palette. Values besides the prir working specifications based on supplied visual references.

USAGE

Default light mode: white or near-white canvas, navy headings, teal primary calls to action, mist car promotional surfaces, sky-blue support accents. Keep colour behind controls subtle; allow product im retain natural colours.

Avoid putting sky-blue, beige or sage text on white at body size. Use navy or forest for readable text colour contrast checks for final component pairs.

Typography and wordmark

Distinct editorial voice, straightforward transactional UI. Only the verified Vossie logo asset is

Canto

EDITORIAL / DISPLAY

Page headlines, carefully chosen campaign lines and empty-state messages. Avoid for field labels, transaction amounts and dense grids.

Minimalist

INTERFACE / UTILITY

Product titles, prices, navigation, chips, forms, captions, statuses and buttons. Production substitute: a legible platform sans if unavailable.

Oline / custom logo

Reference family only. Display the approved outlined wordmark; never assume typing “vossie” in a font recreates the original mark.

TYPE SCALE / MOBILE

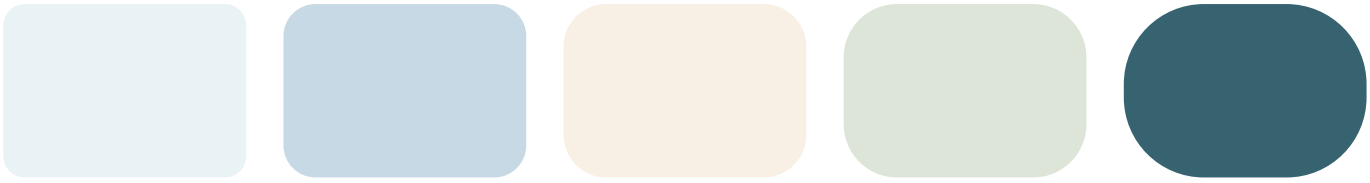

Display	32 / 38	Canto	Welcome and hero
Page heading	27 / 34	Canto	Explore, Account
Section heading	19 / 26	Minimalist / Semi Bold	Fresh finds
Card title	15 / 21	Minimalist / Semi Bold	Listing name
Body	14 / 21	Minimalist / Regular	Descriptions
Meta / label	12 / 17	Minimalist / Medium	Location, status
Micro	11 / 15	Minimalist / Medium	Short auxiliary labels

Spacing, shape and motion

Use an 8-point rhythm with 4-point micro increments. Prioritise a stable, predictable grid.

Layout	390 pt/px design reference; 16-20 px horizontal margins; 12-16 px gutters; px section gaps.
Spacing tokens	4, 8, 12, 16, 20, 24, 32, 40, 48 px. Favour 16 px inside cards and 24 px bet major sections.
Radius	8 px micro, 12 px fields, 16 px cards, 20 px hero, 999 px pills. Product imag 14-16 px.
Touch targets	At least 44 x 44 pt on iOS; primary buttons 52-56 px high; maintain adequa distances between tap targets.
Elevation	Use restrained borders and very soft shadows. Floating navbar is elevated; standard list cards are nearly flat.
Icons	SF Symbols on iOS for native build; consistent 20-24 px optical sizes, 1.5-2 stroke for outlines.
Motion	Tap 120-180 ms, view transitions 220-320 ms, spring only for restrained fee respect Reduce Motion.

RADIUS & SPACING REFERENCE

8 px **12 px** **16 px** **20 px** **Pill**

Reusable UI components

A small, consistent set of variants drives all 177 marketplace screens.

EmptyState, Toast, Sheet, Tabs, Stepper, PriceBreakdown.

Navigation and information archite

The bottom navbar order is locked. Account subpages do not replace the five main tabs.

LOCKED MAIN TABS

Home	Feed, search, promos, categories, fresh finds
Explore	Search, category browse, filter, discovery
Reels	ONE shoppable vertical reel at a time
Activity	Orders, bookings, rentals, active statuses
Account	Profile, role switch, wallet, points, saved, messages

Variation 02 / Floating Capsule

White pill-shaped dock, subtle shadow, safe-area spacing, grey inactive SF Symbols. Selected tab u
#376371 rounded capsule and white filled icon. Use labels below icons. No extra sixth tab.

ROLE NAVIGATION

Buyer, Seller and Courier share one verified student identity but have different allowed dashboards.
selection lives inside Account, not in the main tab bar. Display unavailable roles as enrolment/verific

Screen patterns: discovery

Shared shell, different content models. The platform must show varied real student listings, no merchandise.

01 / HOME

Friendly personal greeting, search, promo banner, category tiles ar fresh finds. Listings are independent seller content; banners are optional and sparing.

02 / EXPLORE

Campus selector, search, compact category chips, 2-column discov cards, favourites, price and fulfilment metadata. No location claims without data.

03 / REELS

Single vertically dominant 9:16 video with seller tag, product CTA a actions (save, chat, share, report). Swipe vertically to next reel.

04 / ACTIVITY

Active / Completed / Cancelled tabs. Distinguish order, booking and rental. Update statuses from the server; do not fake courier ETA.

05 / ACCOUNT

Profile, verified status, role switching, wallet, points, orders, saved inbox and settings. Settings and security remain separate.

SCREEN-SPECIFIC VISUAL RULE

Reels: one video per viewport. Explore: grid browse. Activity: structured transactional records. Messages: readable list plus separate chat thread. Wallet: clear ledger. Points: rewards ledger distinct from actual mo

Authentication and trust

Institutional verification is a security flow, not just a visual state. Treat every status as data-d

01 Splash	Approved geometric wordmark on plain beige, white or teal. Brief, accessible entrance motion.
02 Welcome	Editorial campus and student-marketplace imagery, minimal Vossie-marked CTA styling, Eduvos/QR entry paths.
03 Microsoft	Hand over to the real Eduvos Microsoft SSO experience. Do not recrea fake password field.
04 Profile setup	Verified user name, institutional email (read-only), campus selection, optional photo; only first-time eligible users.
QR sign-in	Only accept a valid issued, expiring QR sign-in token. Scanner is not p of identity by itself; verify the session before entry.

STATE VARIANTS / REQUIRED

- **Loading** — skeleton / progress
- **Empty** — clear next action
- **Error** — plain-language recovery
- **Offline** — stale data visibly labelled
- **Restricted** — eligibility explanation
- **Success** — only after server confirmation

Accessibility and implementation

These are acceptance criteria for production in Expo / React Native and web, not just appearan

- ✓ Minimum touch area 44 x 44 pt; labels retain readable size on smaller iPhones.
- ✓ Aim for WCAG AA text contrast. Check each actual text/background combination, including image c
- ✓ Use status text plus icons, never colour alone for confirmed, late, cancelled or unavailable.
- ✓ Type scales with accessibility settings; fixed heights must not clip localised or enlarged copy.
- ✓ Use SF Symbols only where platform rights permit. Provide matching custom SVGs or icon mapping Android/web.
- ✓ Account email is read-only; Microsoft sign-in remains a delegated authentication flow.
- ✓ Price, seller, stock, delivery, booking and verification state come from live data, not presentation
- ✓ Reorder starts a new transaction; never silently charge based on an earlier order.
- ✓ Dark mode only after auditing all semantic aliases, photos, badges, shadows and contrast.
- ✓ Use skeleton, empty, offline, error, loading and permission-denied states for major screens.

DELIVERABLE CONVENTION

Design tokens accompany this PDF as JSON, CSS custom properties and TypeScript. The logo crop is re artwork; use the original approved editable wordmark in actual app builds. Fonts require licensed local fallbacks.
